

Vaccination Campaign Covid 19

1. Object:

As part of the fight against the covid 19 virus, the Kingdom of Morocco has decided to launch a vaccination campaign for all citizens.

For this reason the Kingdom of Morocco has appealed to the Ministry of Health to launch this campaign and facilitate access to all Moroccans.

2. User Management :

An Admin will take charge of the management of each Manager of a region, and each Manager of a region will be in charge of Centers. Users take part of the vaccination campaign inscription.

2.1. User Roles:

Admin:

Creates a Manager of a region.
View all statistics.

Manager:

Creates centers of his region.
View some statistics about his region.
Validates user vaccination status.

User:

Vaccination inscription.
Vaccination appointment.
Declare sickness or side effects.

3. Specifications:

- Vaccination only for people above 12 years.
- User selects which vaccine he wants : first, second or third.
- User needs to mention if he has a sickness or he follows a specific treatment (in this case the system shows the treatment to follow before taking the first vaccine and the time to wait ex: 1 month).
- If it's his second vaccine, he must mention if he got some secondary effects from the first.
- If it's his third vaccine, same as the second.
- User fills the form with his information (address, city, phone number and CIN).
- Regional manager: adds vaccinations centers.
- User selects which center he wants (depending on the selected region).
- Regional managers can see statistics about how many took vaccination (1, 2 and 3) and how many had secondary effects.
- Users receive email confirmation of appointment of the next vaccine (one month).
- If the user had secondary effects his next appointment will be delayed by one month.
